Abstract:

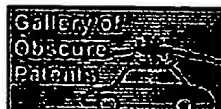

PURPOSE: To provide beautiful stained glass which is equally of high quality to stained glass of conventional color glass and prepared at comparatively low cost with less preparation time and labor by using a phase difference plate and a light polarizing plate.

CONSTITUTION: Previously color-matched and cut phase difference plate pieces (2)... are arranged and stuck in a mosaic pattern on a substrate (1). The border line between the phase difference plate pieces (2) is defined by a dividing member (5). Next, light polarizing plated (3), (3) are stacked starting with the both ends of the substrate (1) with the phase difference plate piece (2), and further protecting plates (4), (4) are stacked from the both ends.
